

Tile Replacement Mount Time Trial Results

Key Takeaways

Tile Replacement Mount **eliminates the need to cut tiles**, resulting in faster installation.

Tile Replacement Mount will save an average of **one minute per mount**.

Summary of Test Results

In August of 2016, time trial testing on Quick Mount PV's Tile Mount Products took place at Quick Mount PV's facility. Three different products were tested and each product went through three time trials. The trials were conducted on an indoor test roof, and eight mounts were installed for each trial. The installers were 3rd party and Quick Mount PV timed and monitored the trials. Results showed that the Tile Replacement Mount was **26% faster than the Universal Tile Mount and 22% faster than Quick Hook**. The Tile Replacement Mount eliminates the need to cut tiles, resulting in the Tile Replacement Mount saving time. Although there are a number of variables that affect installation times, the **Tile Replacement Mount will save on average a minute per mount**.
